PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with expertise in building scalable, high-performance web applications using modern JavaScript frameworks and cloud technologies. Specialized in Next.js, React, TypeScript, and Node.js with strong DevOps capabilities including CI/CD pipelines, automated deployment, and cloud infrastructure management on Vercel. Proven track record of developing production-ready applications with optimized performance, implementing comprehensive API integrations, and maintaining robust version control workflows. Experienced in both frontend architecture and backend systems, with a focus on creating seamless user experiences and efficient development pipelines.

TECHNICAL SKILLS

Frontend	Next.js, React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Framer Motion
Backend	Node.js, REST APIs, Google Apps Script, JSON APIs, Express.js
DevOps & Cloud	Aws, Vercel (CI/CD, Deployment Automation), Git, GitHub, GitHub Actions, Environment Variables, Production Debugging, Performance Monitoring
Database	Google Sheets (Backend Database), Firebase, MongoDB (Basic)
Tools & OS	VS Code, Chrome DevTools, Postman, npm/yarn, Linux (Fedora), Windows, WordPress (Elementor)
State Mgmt	Redux, Context API, React Hooks, Zustand
CMS	Wordpress - elementor

PROFESSIONAL EXPERIENCE

Full Stack Developer

Viral Fever Interactive | Remote | August 2024 - Present

- Architected and deployed production-ready applications using Next.js 14+ with TypeScript, implementing server-side rendering (SSR), static site generation (SSG), and API routes for optimal performance and SEO

- Established comprehensive CI/CD pipelines on Vercel with automated deployments, preview environments for pull requests, and production monitoring, reducing deployment time by 70%

- Developed custom RESTful APIs and integrated third-party services including Google Apps Script for backend automation, handling data synchronization with Google Sheets as a lightweight database solution

- Built reusable, type-safe React components with TypeScript, implementing design systems with Tailwind CSS and Framer Motion for fluid animations, improving code reusability by 60%
- Managed version control workflows using Git and GitHub, conducting code reviews, implementing branching strategies, and maintaining documentation for team collaboration
- Optimized application performance through code splitting, lazy loading, image optimization, and implementing responsive design principles, achieving 95+ Lighthouse scores
- Collaborated with cross-functional teams including designers and product managers to translate requirements into technical specifications and deliver pixel-perfect implementations

Web Developer - React.js

Viral Fever Interactive | Remote | August 2024 - December 2024

- Developed interactive single-page applications (SPAs) using React.js with Redux for state management, implementing component lifecycle optimization and custom hooks
- Integrated RESTful APIs with error handling, loading states, and data caching strategies to improve user experience and reduce server load
- Implemented responsive layouts using CSS Grid, Flexbox, and modern UI frameworks including Tailwind CSS and Bootstrap for cross-device compatibility
- Conducted thorough code reviews and debugging sessions, ensuring code quality standards, best practices, and maintainable software architecture

KEY PROJECTS

Freelance DevOps Engineer | Remote | Freelance | 2025

- Diagnosed and resolved production outage on AWS EC2 instance for CoffeeLabs website caused by malicious and unnecessary files affecting system performance and stability
- Performed system cleanup, removed compromised files, and restored server integrity
- Scaled EC2 instance to a higher capacity to handle increased traffic and improve application reliability
- Optimized server performance and ensured stable production deployment
- Demonstrated incident response, production debugging, and cloud infrastructure management skills

Automated Data Management System | *React, Google Apps Script, REST API*

- Created a custom content management system using React frontend connected to Google Sheets backend via Google Apps Script REST API
- Implemented CRUD operations, real-time data validation, and automated email notifications using Google Apps Script triggers
- Reduced manual data entry time by 85% through automation and improved data accuracy with validation rules

E-Commerce Platform with Modern UI | *React, Redux, Tailwind CSS, Framer Motion*

- Developed a responsive e-commerce web application with shopping cart functionality, product filtering, and checkout process
- Implemented global state management using Redux Toolkit, managing complex application state across multiple components
- Enhanced user experience with Framer Motion animations and Tailwind CSS utility classes for modern, accessible design

EDUCATION

Bachelor of Technology in Computer Science & Engineering

College of Engineering, Pathanapuram | June 2018 - July 2022 | CGPA: 6.7/10

- Relevant Coursework: Data Structures & Algorithms, Web Development, Software Engineering, Database Management Systems, Operating Systems
- Final Year Project: Exercise Tracking AI - Developed an AI-powered application using computer vision for real-time exercise form analysis and rep counting

CERTIFICATIONS & TRAINING

- **Full Stack Developer Internship - Viral Fever Interactive, Vytilla, Kochi, Kerala**
- Modern JavaScript Development (ES6+) - Self-paced online learning with focus on async/await, promises, and functional programming
- Next.js & TypeScript - Advanced concepts including Server Components, App Router, and type-safe development

LANGUAGES

English (Fluent), Malayalam (Native), Hindi (Intermediate), Tamil (Intermediate)
